GUARDIAN PLATFORM BRIEF

Guardian Plans and Add-ons

Guardian Core, Assurance, Managed Defence and modular expansion.

INTENDED AUDIENCE	Business leaders, procurement teams, security leaders, MSPs and MSSPs
PUBLICATION STATUS	Commercial structure approved for website drafting; exact allowances and pricing remain proposal-specific

Guardian Core

Guardian Core provides the customer workspace, Security Dashboard, Risk Register and All Actions, Guardian University and Human Risk, Guardian Dark Web Monitoring, Guardian Website Vulnerability Monitoring, and standard evidence and reporting.

Guardian Assurance

Guardian Assurance includes everything in Core and adds broader Vulnerability and Remediation, prioritised remediation workflow, resolution tracking and assurance-focused reporting.

Guardian Managed Defence

Guardian Managed Defence includes everything in Assurance and adds Guardian Security Operations, Aegis managed threat detection and response, alerts, investigations, log-source health and Security Operations reporting.

Website vulnerability monitoring and Katana

Guardian Website Vulnerability Monitoring is included in Core for the approved website allowance and monitoring cadence. Katana is an optional add-on for deeper active website and API security testing, authenticated or custom assessment profiles, additional cadence, richer evidence and included rescans.

Managed protection modules

- Guardian Endpoint Protection and Managed Patching - endpoint security management plus operating-system and supported application patching for covered devices.
- Guardian DNS Protection - managed DNS security policy, malicious-domain blocking, activity visibility and operational follow-up.

Additional specialist modules

- Guardian Katana Website and API Security Testing
- Guardian Infrastructure Assessment
- Guardian Intelligence
- Advanced Security Reporting

Allowances and separately scoped services

Included users, monitored domains, email addresses, keywords, websites, endpoints, targets, schedules, patch windows, ingestion, retention and service commitments are confirmed in the applicable package schedule. Penetration testing, secure code review, cloud security review, incident response, custom integrations, engineering remediation outside an agreed managed-module scope and bespoke training content remain separately scoped unless expressly included.
