

GUARDIAN PLATFORM BRIEF

Guardian Website Vulnerability Monitoring

Baseline website vulnerability monitoring included in Guardian Core.

INTENDED AUDIENCE	Business customers, website owners, providers and security teams
PUBLICATION STATUS	Included in Guardian Core - approved website allowance and monitoring cadence are confirmed in the package schedule

Included in Guardian Core

Guardian Website Vulnerability Monitoring provides baseline vulnerability and exposure visibility for the approved websites included in the customer package schedule.

What customers receive

- Approved website inventory and monitoring allowance
- Baseline supported website vulnerability and exposure checks
- Customer-safe findings with severity, status and practical context
- Guardian risk and All Actions linkage
- Approved evidence and remediation follow-up
- Standard Guardian reporting

Katana is the add-on

Katana is separately entitled for deeper active website and API security testing, including approved scheduled or on-demand assessments, authenticated or custom assessment profiles, richer evidence, included rescans and additional testing workflows.

Commercial boundary

The package schedule confirms included websites and monitoring cadence. Manual penetration testing remains separately scoped unless expressly included in the applicable proposal.
